

The 36<sup>th</sup> Annual UVA Children's Hospital  
**RESEARCH SYMPOSIUM**

**Madhusmita Misra, MD, MPH**

*Benjamin Armistead Shepherd Professor and Chair of Pediatrics, UVA*

*Physician-in-Chief, UVA Health Children's*

*Fritz Bradley Talbot and Nathan Bill Talbot Professor of Pediatrics, Emerita, Harvard Medical School*

*Past President, Pediatric Endocrine Society*

*Join us for thought provoking discussions  
as part of **Research Day on May 30<sup>th</sup>***

*hosted by the  
Child Health Research Center*

Dr. Misra is a Physician Scientist, Her work pertains to neuroendocrine and bone consequences of conditions spanning the weight spectrum from anorexia nervosa to the female athlete with oligo-amenorrhea to obesity, and she has also examined bone consequences in children with autism spectrum disorder and type 1 diabetes. Her work has been paradigm shifting in the management of low bone density in conditions of energy deficit, and driven management recommendations in this field.

**“My Journey from Bone to the Brain”**
