

Camp LIGHT is looking for volunteers!!!

Camp Dates–5 weeks this summer

open 9am to 4pm Tues, Wed, Thurs:

June 16–18, 23–25, July 14–16, 21–23 & 28–30.

Creative Works Farm, a local 501–c(3) non–profit organization, is developing Camp LIGHT on a 162 acre farm off of Purple Cow Rd. in Waynesboro. We will provide kids ages 6–17 with chronic illnesses or other special needs, including at risk youth, with a fun summer camp experience at no cost to the families of the kids attending. This is Camp LIGHT's second year hosting local youth in our summer day camp programs.

(The camp is scheduled to be complete in 2016 or 2017, depending on funding, and will host as many as 600 kids every summer.)

If you would like to volunteer to be a counselor for one or more weeks, please contact us to discuss details. We are seeking individuals with experience working with kids with a variety of chronic illnesses and other special needs. There are also opportunities to volunteer for one or two days if you are unavailable all 3 days of the week. We will hold an orientation prior to your first day in order to train all counselors and aides on expectations, safety, program outline, and other areas. All counselors will have a background and reference check completed prior to beginning work with the kids. This is a volunteer (unpaid) position. Camp LIGHT relies on volunteers in order to continue to offer summer camp at no cost to the campers and to continue future development.

Contact Kelly Truxell at (540)290–2333 or email kelly@creativeworksfarm.org for more information. Also, visit our website at www.creativeworksfarm.org to learn more about the camp.

Our Mission is to show kids with special needs and circumstances that life is only limited by their imagination, and to give them new tools and skills, along with love and support, to inspire them to become anything they can dream.

Our goals are: to provide every child with special needs a chance to experience the fun, freedom, creativity and love that happens during a week at Camp LIGHT; to produce a facility that showcases cutting–edge energy conservation, energy production and environmental responsibility; and to contribute to the area's economic vitality by attracting an anticipated 10,000 visitors /year through CWF building tours, conference facilities and event resources.
